

# ONTARIO EAST

Welcome to Deep River Area

**The Deep River Area is home to Atomic Energy** of Canada's world famous Chalk River Labs (CRL). CRL has been an important contributor Canadian Scientific knowledge for over sixty years. Candu Reactors, based on science developed at CRL, supply over fifty per cent of Ontario's power and are among the world leaders reactor efficiency and safety. Not only does CRL produce radioisotopes that benefit approximately 67,000 people around the world on a daily basis, but the science that forms the basis of virtually all nuclear medicine was developed in Chalk River. CRL employs approximately 2800 people in the Ottawa Valley and boasts world class expertise in physics, chemistry, biology and engineering.

**National Research Council's Canadian Neutron Beam Centre (CNBC)** annually enables over 200 researchers to use neutron beams as tools for world-class materials research, which provides new understandings of materials and improves products for businesses. Researchers include scientists, engineers and students from Canada and twenty other countries around the world. CNBC enables industrial research in sectors such as nuclear energy, aerospace, automotive, oil and gas, defense and primary metal production.

**Bubble Technologies Industries (BTI):** BTI is a dynamic company with world-renowned expertise in the field of radiation detection. With a track record of over fifteen years of innovation, BTI combines scientific, engineering, and manufacturing expertise to yield advanced solutions to complex radiation-related problems. BTI provides commercial products, radiation services, consulting, and contract research and development to a wide range of prominent clients, including military organizations, space agencies, regulatory and international standards groups, research institutions, and national security agencies.

**Located in the beautiful Ottawa Valley,** The Deep River Area offers residents and visitors alike outstanding recreational amenities in an beautiful natural environment. Great beaches, renowned ski trails, and superb fishing, golfing and sailing present only a few of many lifestyle opportunities that are available.
